

LAS CASITAS DEL SUR GATE PROGRAMMING FORM

1. Las Casitas Del Sur offers an electronic gate system at its entrance/exit. These gates are designed to be a deterrent to unauthorized persons, but are in no way a guarantee of personal safety or security. The system is only effective in controlling vehicle traffic.
2. Each resident's name will be listed in the outside directory. Visitors will be able to scan alphabetically for your name and then push the "call" button. The entry system will dial your phone and you will be in communication with the visitor at the gate.
3. If you wish to let them in press or dial "9" on your phone. (Note: on short duration tone phones, you may have to press "9" twice) The entry system will then open the gate and then you may hang up. If you do not wish to let the guest in, simply hang up. The entry system permits conversation for 1 minute and then will disconnect. (A short beep will be heard 10 seconds before disconnecting).
4. Never attempt to force a gate if your remote does not work! Severe damage to your vehicle and gate will result. We will not be responsible to any damage to your vehicle.
5. Please choose 2 four-digit codes and write it in at the bottom of the page. One code for personal 24hour use and one code for vendors only. Your vendor code will only be active 6AM to 6PM. To use the code, enter access code on main screen.

I have read and understand the above:

Signature: _____ Lot #: _____

Property address: _____

Name to be on directory: _____

Personal 4 digit code: _____ Vendor 4 digit code _____

Telephone # (for front gate) _____
